Please cancel Claims 2, 3, 7, 8 and 9.

CLAIMS

We Claim:

1. (Currently Amended) A vehicle combined back-up and battery low-level alarm comprising:
 - a back-up alarm circuit;
 - a voltage sensing and comparing circuit;
 - a timing circuit; and
 - a gating circuit;wherein the gating circuit performs tone generation output in response to inputs from the back-up alarm circuit, voltage sensing and comparing circuit, and the timing circuit[.];
wherein the voltage sensing and comparing circuit is responsive to two different voltage thresholds, and there is different alarm mode timing for each respective threshold; and,
wherein the back-up alarm circuit has alarm mode precedence over the voltage sensing and comparing circuit.
2. (Cancelled)
3. (Cancelled)
4. (Original) The combined alarm of Claim 1, which also comprises a signaling lamp.
5. (Original) The combined alarm of Claim 4, which also comprises an ambient light sensor.

6. (Original) The combined alarm of Claim 1, which is incorporated within a single housing.
